About Me

I'm pursuing a B.Tech in Artificial Intelligence and Machine Learning at SRM University, with a keen interest in frontend development and UI/UX design. I'm actively learning to build responsive, accessible, and user-focused web interfaces, and have started applying these skills through hands-on projects that reflect real-world design and development challenges.

Skills

- HTML, CSS, JavaScript
- UI/UX Design, Figma, Prototyping, Wireframing
- Responsive Web Design

Experience

Frontend Developer – Maitri Society Website (NGO)

Role: UI/UX and Frontend Developer

- Developed and structured the entire frontend using HTML, CSS, JS
- Collaborated with the NGO to represent themes like women development and child welfare
- Focused on a mobile-first, user-friendly, and accessible layout

Projects

Maitri Society – NGO Website

<https://ria-varsha.github.io/maitri-page/>

A professionally designed website focusing on women development, economic initiatives, and child welfare. Responsive layout with clear navigation for transparency.

Shrey Sweets – E-commerce Product Page

<https://ria-varsha.github.io/shrey-sweets-page/>

Responsive product page for Shrey Sweets' jar cakes. Features carousel product views, quantity buttons, and discount highlights.

Artisan Roots – Handicrafts Website

<https://ria-varsha.github.io/artisan-craft-page/>

Single-page scroll website with traditional design, animated transitions, and gallery/team/contact sections.

Education

B.Tech in Artificial Intelligence and Machine Learning

SRM University

Currently in 3rd Year
